EDUCATION

Oregon State University, Honors College
Bachelor of Science in Computer Science, Minor in Business

- Expected Graduation: June 2028 • Sophomore with Junior Standing • GPA: 4.0
- **Relevant Courses:** Data Structures, Web Development, Discrete Math, Computer Architecture, Foundations of the Entrepreneurial Mindset, Technical Writing, Principles of Marketing, Principles of Microeconomics

EXPERIENCE

Product Management Intern, Cardinal Services (via OSU Product Management Club) | Apr 2026 - Sep 2026

- Defined product strategy for a customizable employee onboarding handbook through qualitative research and collaboration with cross-functional leadership
- Refined requirements for policy templates, content updates, and version management to improve usability, accessibility, and HR workflows

Undergraduate Researcher, Oregon State University, URSA Engage | Feb 2026 - Present

- Analyze datasets covering 90+ Oregon truck parking locations in Python to support mathematical programming models for emergency parking networks
- Collect data, review literature, and present progress and findings to faculty mentors weekly

Software Engineering Intern, Vercible | Aug 2023 - Mar 2024

- Collaborated with engineering and design teams to build an interactive web quiz using HTML, CSS, and JavaScript
- Integrated a Python-based AI chatbot into the website and iterated on system and data designs to improve usability

Event Coordinator, OSU Product Management Club | Jun 2026 - Present (board member since 2025)

- Coordinate technical workshops and synthesize priorities from 10+ board members to align programming with club goals

PROJECTS

Electable - Civic Engagement Web Application, OSU BeaverHacks Hackathon | May 2026

- Built a civic engagement MVP in 24 hours that processes Federal Election Commission datasets to make election information more accessible
- Developed a 10-question policy-alignment quiz using the Gemini API to match voters with congressional candidates
- Implemented a searchable frontend for local ballot information, candidate platforms, and campaign funding data
- Used GitHub pull requests and peer code review; wrote unit tests and debugged manually, and reviewed all AI-generated code before use

SKILLS

Languages: Python, Java, JavaScript, C++, SQL
Web & Data: React.js, Node.js, Express.js, HTML, CSS, MySQL, Data Analysis
Tools: Git, GitHub, Linux, Bash, VS Code, PyCharm, Vim, Gemini API
Practices: Unit testing, debugging, code review, pull requests, qualitative user research, requirements writing
